

Dental Treatment Warranty

For a period of **5 years** from the date of treatment, Galligan Family Dentistry will repair, replace, or provide a refund for the *restorative** dental treatment rendered based on the following guidelines and exclusions. Failure to fulfill the following requirements will void the dental treatment warranty.

Craftsmanship and Durability: Warranty is limited to failure of the craftsmanship and/or durability of materials for dental treatment rendered at Galligan Family Dentistry. Causes of failure outside the control of Galligan Family Dentistry will not be considered within the treatment warranty (i.e. trauma, severely neglectful oral hygiene, destructive oral habits, etc.)

Recare evaluation: Restorative dental treatment must be professionally evaluated and maintained at your periodic examination and recare appointments at least every six months.

Dental treatment is constantly undergoing attack from dietary acid, plaque bacteria, and biting forces. Restorations must be routinely cared for both at-home and in-office.

Oral Health and Function Stability: All planned *priority*** dental treatment must be completed within one year of the treatment plan initiation.

Teeth function in association with muscles and joints as a full system. Therefore, repairing one facet of this system and avoiding others will not allow the complete oral system to function properly. Dental treatment can deteriorate prematurely if the complete system functionality is not addressed.

Exclusions: The following restorative procedures have unpredictable longevity despite meticulous delivery of treatment and use of premium dental materials and are excluded from this warranty.

- Bonding/fillings for restoring chipped front teeth.
- Bonding/fillings for restoring gum-line teeth abrasion.

* Restorative dental treatment includes sealants, fillings, onlays, crowns, bridges, implant components, root canal therapy, partial dentures, and complete dentures.

** Planned dental treatment includes all treatment directly associated with the health and function of teeth. All treatment plans will notate priorities for treatment. Treatment that is optional or cosmetic in nature is not considered priority treatment and will not be considered for fulfillment of this warranty.
